EMBISEC by Móholt

Inspect the evidence. Then plug in.

What it is

A sovereign case and records layer for classified work: STANAG 4774 labels and 4778 bindings on every record, a tamper-evident audit chain, and a **device-authoritative offline node (EMBISEC-L)** for vessels, vehicles and sites. Icelandic and NATO-standard classification profiles run today.

What it plugs into

Secure-exchange and cross-domain products (labelled records in and out) · C2 and situational-awareness tools (the accountable case behind the picture) · intelligence delivered as **DCAT / Dataspace Protocol** data products · ACP-121 signals filed to bundles.

EVIDENCE PACK · BUILD 2026.09 · ed25519:9f3a...c21e		SIGNED
release-manifest.json	image digest ✓ · git ✓ · SBOM ✓	SIGNATURE VALID
sovereignty-manifest.yaml	hosting ISL · custodians: customer · egress declared	0 DRIFT
STANAG 4774 / 4778	label round-trip · binding verified offline	PASS
declared records	41/41 sha-256 fixity · registry gapless	PASS
audit chain	1 412 entries re-hashed · prev_hash links	PASS

STATUS · in evaluation with Icelandic public-sector users · not yet accredited · TRL 6 / 5 / 4 (EMBI / EMBISEC / EMBISEC-L) · crypto & cross-domain guards: partner components
